

To our Belmont Members and Belmont-Primary Annual Passholders:

As expected, the expansion of the [Trans Mountain Pipeline](#) will now affect Belmont Golf Course operations. We have been advised that the tentative start date for construction on Belmont lands will be October 15, 2022. At that time, the course will be closed completely.

Construction of the pipeline is scheduled to be complete by June 2023, with the course needing a period of recovery before reopening. We will advise everyone of our anticipated reopening date as soon as we are able.

The West Coast Golf Group is excited to have the opportunity to carry out several extensive course improvement projects at Belmont during this temporary closure.

Members and Annual Passholders will have access to book and play Hazelmere & Swaneseet's courses during the temporary closure.

Any questions, comments or concerns can be directed to info@wccg.ca.
